DETAILED ACTION

EXAMINER'S AMENDMENT

1. The application has been amended as follows: on the first page of the specification, underneath the title, the following has been inserted --This application is a 371 of PCT/JP2006/311469, filed June 01, 2006, and claims foreign priority from Japanese application 2005-166754, filed June 07, 2005. --

Allowable Subject Matter

2. Claims 1 and 3-9 are allowed.

3. The following is an examiner's statement of reasons for allowance: independent claims 1, 7, and 8 require "a dendritic framework having mesopores; wherein 90% or more of the mesopores observable in a 500 nm x 500 nm area pass through the framework in a direction perpendicular to a longitudinal direction of the framework."

Art Unit: 1759

Independent claim 9 similarly requires "... having a dendritic framework with mesopores supporting the biological material, wherein 90% or more of the mesopores observable in a 500 nm x 500 nm area pass through the framework in a direction perpendicular to a longitudinal direction of the framework."

Although Applicant in his Remarks submitted on September 28, 2010 merely states that Iyer does not disclose a dendritic framework having mesopores, without explaining how it does not disclose a dendritic framework, the Examiner has reconsidered Applicant's entire original disclosure and decided that Iyer does not disclose a dendritic framework having mesopores. The online Merriam-Webster dictionary defines "dendritic" as "resembling or having dendrites: branching like a tree." This is consistent with Applicant's usage of the term. See, for example, specification page 25, lines 07-11, wherein a rod-shaped structure having a large number of branches labeled a dendritic framework. Based on Applicant's specification a "framework" is the portion between the mesopores that forms the wall separating the mesopores from each other. See specification page 9, lines 08-10. As such, upon reconsideration the Examiner has decided that the mesoporous silica in Iyer shown in Figure 1 is not a *dendritic* framework, that is a branched framework, like tree branches, having mesopores, nor would a dendritic framework be desirable in Iyer as Iyer seeks an ordered array of mesopores, such as a hexagonal array. See col. 04:39-53.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1759

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ALEX NOGUEROLA whose telephone number is (571) 272-1343. The examiner can normally be reached on M-F 8:30 - 5:00.
